Amount (from 1,000,000,000 Baht)	0.900%	0.700%	0.250%	0.900%	0.700%	0.250%

Remarks: Condition of interest payment

- The formula of interest calculation Interest of Deposit =  $\frac{\text{Principle} \times \text{Interest Rate}(\%) \times \text{number of deposit days}}{365}$
- The bank uses 365 days for interest calculation.
- For saving deposit accounts, the bank calculates interest on semi-annual basis as well as pays to the customer on 15th June and 15th December every year
- The bank doesn't pay the interest for deposit period less than 3 months in case that this is a withdrawal prior to the maturity date of time deposit account
- The bank will use the saving deposit interest rate to pay the interest for deposit period more than 3 months in case the this is a withdrawal prior to the maturity date of time deposit account
- The bank may pay interest rates higher than the announced rates (which have to get approved by Top Management) to potential customer who is a large depositor or have the trend to use other bank's financial products
