| 3. Additional disclosure of capital under the BCBS requirements | 22 |

#### **Scope of Application**

Pursuant to the Bank of Thailand's (BOT) 's guideline in the supervision of capital for commercial banks based on Basel III, Bank of China (Thai) Public Co., Ltd ("the Bank") hereby discloses information regarding capital, risk exposures, risk assessment processes and additional disclosure of capital under the BCBS requirements (Solo Basis).

#### 1. Capital

#### 1.1 Capital Structure

- Common Equity Tier 1 (CET1)
  - o Paid-up capital (common stock) deducted by buyback of common stock
  - Legal reserves
  - o Other items of owner's equity
  - o Items to be deducted from CET1
    - Net losses
    - Goodwill
    - Deferred tax assets
    - Intangible assets
    - Accumulated loss from ECL recognition
- The Bank does not have additional Tier 1 capital currently.
- Tier 2 Capital

The Bank issued THB 1,413 million of subordinated debentures pursuant to Tier 2 subordinated debenture to Bank of China (Hong Kong). The debentures are qualifying capital instruments under Basel III and could be fully counted as Tier 2 capital.

The Bank is a wholly owned subsidiary of Bank of China (Hong Kong). The following table is a breakdown of the Bank's capital as of December 31, 2023, compared with the position of the Bank as of December 31, 2022.

**Table 1: Capital Structure** 

|         |   |                   | Unit: Inousana Bani |

| 3. Tota | l regulatory capital  | 11,926,817        | 11,890,748          |

#### 1.2 Capital Adequacy

The Bank is required to calculate and report capital adequacy ratio to Bank of Thailand on a monthly basis, and is required to maintain a minimum Capital Adequacy Ratio of 11% since year 2019, with the minimum ratio of Common Equity Tier 1 and Tier 1 capital to risk weighted assets at 7.0% and 8.5% respectively according to Basel III/Pillar I. The Bank actively monitors and ensures capital above the minimum requirement. As of Dec 31, 2023, The Bank's Capital Adequacy Ratio (CAR) was 22.11%.

For each risk type under Pillar I, The Bank adopts the following approaches to calculate the regulatory capital requirements:

Credit Risk: Standardized Approach

Market Risk: Standardized Approach

Operational Risk: Basic Indicator Approach

The Bank's Capital adequacy ratio is shown in Table 2. The minimum capital requirements for credit risk, market risk and operational risk at the end of 2022 and 2023 are shown in Table 3

**Table 2: Capital Adequacy** 

| Table 2: Capital Adequacy                               | December 31, 2022 | December 31, 2023 |
|---|-------------------|-------------------|
| 1. Total capital to risk-weighted assets                | 22.50%            | 22.11%            |
| 2. Tier 1 capital to risk-weighted assets               | 18.99%            | 19.48%            |
| 3. Common Equity Tier 1 capital to risk-weighted assets | 18.99%            | 19.48%            |

#### 2. Risk Exposure and Assessment

#### 2.1 Credit Risk

Credit risk is the risk of loss that a customer or counterparty is unable to or unwilling to meet its contractual obligations. Credit risk exists in the trading book and banking book, as well as from on- and off-balance sheet transactions of the Bank. It arises principally from lending, trade finance and treasury businesses.

#### 2.1.1 Credit Risk Management Process

The Bank has established credit risk management framework to achieve and maintain high quality credit assets. The framework stipulates the establishment of comprehensive credit policy and procedures, which include independent credit review process, credit approval process, proper credit monitoring and risk reporting mechanism, as well as adequate risk mitigation measures. In order to provide a sound control environment with clear segregation of duties to ensure effective credit risk management process, the Bank has set up the following credit risk management structure:

- The Board of Directors and Risk Oversight Committee (ROC) are responsible for overseeing and supervising the Bank's overall credit risk management, as well as reviewing and approving high level risk exposures.
- Country Head is responsible for managing the Bank's credit risk and approving risk exposures or transactions within his authority. The Bank's senior management is responsible for approving the detailed credit risk management procedures.
- The business units are responsible and accountable for conducting internal credit ratings, assessing, monitoring and reporting credit risk of customers on an ongoing basis.
- Risk management unit is responsible for undertaking risk assessment independently, monitoring credit risk profiles, approving internal ratings, loan grades and impairment allowance. The credit risk management function is in charge of formulating credit risk management procedures, conducting portfolio management and performing stress

test on credit risk. It is also responsible for reporting to the senior management and the risk management unit of the parent bank.

#### 2.1.2 Credit Asset Classification and Impairment

The Bank pursues asset grades to reflect asset quality in accordance with BOCHK's guidelines of asset classification and requirements from BOT. The BOCHK divides asset into five-category (Pass, Special Mention, Sub-Standard, Doubtful and Loss), while BOT classified asset into 3 stages (Stage 1: Performing, Stage 2: Under-performing and Stage 3: Non-performing).

The credit assets are classified by taking into consideration quantitative measure such as the length of days which the principal or interest of credit facility is past due and qualitative measures such as the Significant Credit Deterioration Criteria (SCDC)

To comply with the requirements of Thai Financial Reporting Standard 9 (TFRS 9), the Bank assesses the expected credit loss (ECL) impairment of its credit assets regularly to reflect changes in credit risk since initial recognition which the Bank has adopted ECL% proxy approach from BOCHK to apply for estimation of credit loss.

The Bank calculates the ECL for Stage 1 exposures and Stage 2 exposures by assessing relevant credit information like forward-looking macroeconomic factors and obligors' credit information. ECL for Stage 3 exposures are assessed by considering future discounted cash flow.

Stage 1 exposures shall recognize ECL impairment within the next 12 months while Stage 2 exposures and Stage 3 exposures shall recognize lifetime ECL impairment.

Table 4: Outstanding amounts of significant on-balance sheet assets and off-balance sheet items before adjusted by credit risk mitigation

| Table 4 Outstanding amounts of on-balance sheet and off-balance sheet items |                   |                   |

#### 2.1.3 Credit Rating

When calculating the risk weighted assets (RWA) using the standardized approach (SA) under Basel III, the Bank uses credit ratings from qualified External Credit Assessment Institutions (ECAIs) specified by the BOT:

- Public sector and financial institution borrowers: S&P, Moody's, Fitch and Fitch (Thailand);
  - Private sector borrowers: TRIS, Fitch, Fitch (Thailand), S&P and Moody's;

Corporate Business Department is responsible for collecting external rating of corporate customers; Risk Management Department is responsible for collecting external rating of financial institutions, PSEs, central banks, and sovereigns.

The Bank follows the process of mapping the ECAI ratings with corresponding borrower's risk weights prescribed by BOT.

#### 2.1.4 Credit Risk Mitigation

Main types of collateral taken by the Bank include cash, counter guarantee from other financial institutions, corporate guarantee, and mortgage. The cash collateral shall be deposited and pledged for control. Counter guarantee from financial institutions shall be controlled by Head Office, and the Bank shall review each guarantor quarterly case by case. Main types of guarantor include personal guarantor, corporate guarantor, and financial institutions.

<sup>\*</sup> Values after on-balance sheets and off-balance sheets netting 1/Eligible financial collateral that the Bank of Thailand allows to use for risk mitigation. Commercial banks applying the comprehensive approach shall disclose the value after haircut.

#### 2.2 Market Risk

Market risk is defined as the risk of potential losses of the bank arising from the price volatility or position value including assets, liabilities and contingent liabilities held by the bank. Market risk factors affecting such price or value are change in interest rate, foreign exchange, equity price and commodity price.

BOCT market risk consists of Interest Rate Risk (IRR) and Foreign Exchange (FX) Risk in the Trading Book and Banking Book. IRR refers to the risk of loss due to shifts in the benchmark rate, causing depreciation of values of interest rate-based asset classes. FX risk refers to the risk of loss to an investment due to changes in the currency exchange rate in which the investment is priced. Currently, BOCT adopts the Standardized Model to quantify its Market risk RWA and Capital requirement. Market risk RWA arises solely out of FX Spot, forwards and currency swaps, even though the aggregate foreign currency exposure is small compared to the size of the overall portfolio, The Bank has implemented the following market risk control:

• Establishing Market Risk Limits, e.g. Bank-wide FX Exposure, Trading Book FX Exposure, Profit/loss Limit, Value at risk (VaR), Price Value of Basis Point (PVBP).

- The Bank has established the Market risk management policy approved by BODs to ensure having an appropriate framework and management system for managing and controlling market risk.
- Global Markets Department is responsible for monitoring and reporting market risk related transactions, and ensuring that the level of market risks is within the risk limits determined by BODs.
- Risk Management Department are responsible for implementing market risk management policies, and identifying, measuring, monitoring, controlling and reporting market risk exposures.

Table 16: Minimum capital requirements for each type of market risk under the Standardized Approach

| Table 16 Capital requirement for market risk | December 31, 2022 | December 31, 2023 |
|--|-------------------|-------------------|
| Interest rate risk                           | -                 | -                 |
| Equity position risk                         | -                 | -                 |

| Total minimum capital requirements           | 126,585.31        | 13,278.55         |

#### 2.3 Operational Risk

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external event. It includes Legal and Compliance risk and IT risk, but excludes Strategic and Reputational risk.

All business units and staffs are responsible for systematically managing operational risk according to The Bank's Three Lines of Defense. The Bank stipulated policy and measure of

operational risk which cover all major operational risk points and each department shall monitor its operational risk management according to this policy and measure.

Operational risk management tools such as Risk And Control Assessment (RACA), Key Risk Indicators and Loss Data Collection are used to identify, assess and monitor operational risk exposures. Operational risk incidents that have significant impact shall be closely monitor and report to senior management and Risk Oversight Committee.

In previous, the potential for high-impact, remote-probability events remains, but day-to-day operational risk has largely been mitigated by effective control and management. Moreover, BOCT is cognizant of the reputational risks posed by money laundering activities and customer complaints. Accordingly, it has maintained and developed policies and processes to control these risks. The Market Conduct Policy has been enforced to ensure the soundness of the Bank's operation and process and aims to standardize procedures of management on fair customer treatment.

BOCT currently adopts the Basic Indicator Approach ("BIA") to quantify its operational risk RWA and Capital requirement.

#### 2.4 Interest Rate Risk in the Banking Book (IRRBB)

Interest rate risk refers to losses of earnings and /or economic value of BOCT as a result of changes in interest rates, which can be incurred from on and off-balance sheet exposures in banking book. The objective of IRRBB is to control the movement of interest rate within acceptable level as well as in line with business strategies and risk appetite and tolerance as was endorsed by Board of director. The Bank manages the interest rate risk of the banking book primarily through interest rate re-pricing gap analysis. The data generated by gap analysis is used to perform sensitivity analysis, assist decision making regarding the re-pricing of the interest-earning assets and interest-bearing liabilities. BOCT currently monitors IRRBB on daily basis at 100 bps by following the Group's regulation and BOT's regulation. Moreover, ALCO regularly evaluates cost of fund and use of fund in order to maintain the appropriate interest rate regarding to risk appetite of BOCT.

#### Table 17: The effect of changes in interest rates on net earnings

| Table 17 Interest rate risk in the banking book The effect of changes in |                        |  |  |  |
|--|------------------------|--|--|--|
| Currency   | December 31, 2023      |  |  |  |
| Currency   | Effect to net earnings |  |  |  |
| Thai Baht (THB)  | 41,150                 |  |  |  |
| US Dollar (USD)  | (2,456)                |  |  |  |
| Chinese Yuan (CNY)   | (8,289)                |  |  |  |
| Others   | (422)                  |  |  |  |
| Total effect   | 29,984                 |  |  |  |

| Curronov           | December 31, 2022      |
|--------------------|------------------------|
| Currency           | Effect to net earnings |
| Thai Baht (THB)    | 38,200                 |
| US Dollar (USD)    | (17,262)               |
| Chinese Yuan (CNY) | (12,394)               |
| Others             | 667                    |
| Total effect       | 9,211                  |

<sup>\*</sup>Percentage changes in interest rates of 100 bps has been applied.

# 3. Additional disclosure of capital under the BCBS requirements (Composition of capital disclosure requirements)

For the subordinated debenture which is classified as Tier 2 Capital, the 20% regulatory amortization deduction will be required from year 2022-2027.

Table for disclosure of main features of regulatory capital instruments

|    | Heading  | Details  |
|----|--|--|
| 1  | Investor name  | BANK OF CHINA (HONG KONG) LIMITED  |
| 2  | Unique identifier  | Callable Subordinated Instruments Intended To Qualify As Tier 2 Capital Of Bank Of China (Thai) Public Company Limited Which Will Be Required To Be Written Down (Fully Or Partially) When Government Authority Decides To Grant Financial Assistance To Issuer No. 1/2023 Due 2033  |
|    | Inclusion of the instruments in the capital under the regulations of the Bank of Thailand                            |  |
| 3  | Instrument type (Common equity tier 1 / Additional tier 1 / Tier 2 capital)  | Tier 2 Capital   |
| 4  | Having the features in accordance with the Basel III or not  | Yes  |
| 5  | If having the features not in accordance with the Basel III, specify such features                                   | n.a.   |
| 6  | To be gradually deducted or be included in full  | Gradually deduct after 5 years   |
| 7  | Eligible at solo / group / group and solo  | Solo Basis   |
| 8  | Amount recognised in regulatory capital (unit : million Baht)  | 1,412.79   |
| 9  | Par value of instrument (unit : Baht)  | 1,412,790,000  |
| 10 | Accounting classification  | Liability - amortised cost   |
| 11 | Original date of issuance  | 21 August 2023   |
| 12 | Perpetual or dated   | Dated  |
| 13 | Original maturity date   | 21 August 2033   |
| 14 | Issuer call subject to prior supervisory approval  | Yes  |
| 15 | Optional call date, contingent call dates and redemption amount  | The issuer may exercise its right to early redemption upon the 5th anniversary of the issue date (the first redemption date, 21 August 2028).  |
| 16 | Subsequent call dates, if applicable   | n.a.   |
|    | Coupons / dividends  |  |
| 17 | Fixed or floating dividend / coupon  | Floating   |
| 18 | Coupon rate and any related index  | USD SOFR + 0.97%   |
| 19 | Existence of a dividend stopper  | No   |
| 20 | Fully discretionary, partially discretionary or mandatory  | Partially discretionary  |
| 21 | Existence of step up or other incentive to redeem  | No   |
| 22 | Noncumulative or cumulative  | Noncumulative  |
| 23 | Convertible or non-convertible   | Non-convertible  |
| 24 | If convertible, conversion trigger (s)   | n.a.   |
|    | If convertible, fully or partially   | n.a.   |
| 26 | If convertible, conversion rate  | n.a.   |
| 27 | If convertible, mandatory or optional conversion   | n.a.   |
|    | If convertible, specify instrument type convertible into   | n.a.   |
| 30 | Write-down feature  If write-down, write-down trigger(s)   | Non-Viability Event which means, unless otherwise specified in the Terms and Conditions, the occurrence of the Bank of Thailand and/or any other empowered government agency deciding to grant financial assistance to the Issuer such as in the form of a capital injection, without which the Issuer would become unable to continue its business in any manner, including but not limited to situations as set out below (or any such similar events):  (i)having insufficient resources to make repayments to its depositors and creditors; or  (ii)its capital funds having depleted to the extent that its depositors and creditors will be adversely affected; or  (iii)not being in a position to independent increase its capital base. |
| 31 | If write-down, full or partial   | May be written down partially  |
| 32 | If write-down, permanent or temporary  | Permanent  |
| 33 | If temporary write-down, description of write-up mechanism   | n.a.   |
| 34 | Position in subordination hierarchy in liquidation (specify instrument type which is subordinate to this instrument) | n.a.   |
|    | when is substantate to this flistration.   |  |
